

Homepage Hero & Intro Audit Spec

1. SEO Target Keyword Architecture

- **Primary Keyword:** Enterprise RPO & Strategic HR Solutions
- **Secondary Keywords:** Healthcare Recruitment Process Outsourcing, IT Talent Acquisition, Pre-Screened Candidate Pipelines, AI-Driven HRMS
- **Target Meta Title:** Pepoltek | Enterprise RPO & Healthcare Workforce Solutions
- **Target Meta Description:** Global RPO partner deploying pre-screened IT engineers and compliance-ready healthcare specialists. Reduce time-to-hire to 2-7 days with full-suite HR operations.

2. Copy & Layout Specifications

A. Main Hero Heading (H1)

- **Current:** "Millisecond Response, From a Human..."
- **Fix:** Replace with an explicit RPO value proposition.
- **New H1 Copy:** "Enterprise RPO & Strategic HR Solutions, Powered by Technology."

B. Hero Body Paragraph (Fixing Corrupted HTML Text)

- **Current Bug:** Parsed string text is run together without spaces (**Global Tsolutionsproviderd...**), destroying Google indexing and readability.
- **New Paragraph Copy:**
Pepoltek is an enterprise Recruitment Process Outsourcing (RPO) and strategic HR partner. We combine AI-driven candidate screening, automated technical assessments, and dedicated HR operations teams to deliver pre-vetted IT and compliance-ready healthcare talent within 2 to 7 days.

C. Hero Call-to-Action (CTA) Buttons

- **Current:** "Deploy Talent in 2 to 7 Days" | "Explore Tech & Healthcare Tracks"
- **Fix:** Shift CTAs to reflect full-service HR engagement rather than instant software deployment.
- **Primary Button:** "Explore RPO Solutions"
- **Secondary Button:** "View Pre-Screened Talent"

D. Sticky Capability Pills (UI Constraint)

- **Instruction:** Prevent horizontal scrolling or wrapping beyond hero text boundaries
- **Pill Labels:** Enterprise RPO | AI-Powered HRMS | Healthcare Compliance | Tech & SDLC Staffing

Global Overlap & Flexible RPO Squad Builder Audit Spec

1. Section Overview & SEO Strategy

- **Core Value Narrative:** Shift from pure developer contracting to a global RPO model where clients deploy locally while sourcing talent globally through dedicated recruiting and delivery hubs.
- **Primary Target Keyword:** Flexible Global RPO & Staffing Calculator
- **Secondary Keywords:** Global Timezone Overlap, Time-to-Deploy Benchmark, RPO Cost Comparison Engine, Pre-Screened Talent Sourcing
- **Section Heading (H2):** "Deploy Locally, Source Globally: 24/7 Timezone Coverage & RPO Cost Engine"

- **Section Subtitle:** "Guaranteed daily operational overlap across global hubs. Configure your custom squad across stacks, seniority tiers, and regions to compare real-time savings against traditional recruiting agencies."

2. Widget 1: 24/7 Global Delivery & Timezone Overlap Engine

A. UI Renaming

- **Old Title:** Global Overlap Matrix / "Chasing the Sun"
- **New Title:** 24/7 Global Delivery & Timezone Overlap Engine

B. Hardcoded Region Rows

Replace internal abbreviations with six standardized client and delivery regions:

1. **North America (Onshore):** United States & Canada (PST / MST / CST / EST)
2. **LATAM (Nearshore):** Mexico, Colombia, Brazil, Argentina
3. **UK & Western Europe (Onshore/Nearshore):** United Kingdom (GMT/BST) & Western Europe (CET/CEST)
4. **CEE & Eastern Europe (Nearshore):** Central & Eastern Europe (EET/CEST)
5. **Middle East & GCC Region:** UAE, Saudi Arabia, Qatar (GST/AST)
6. **Primary Delivery Hub (South Asia / APAC):** Bangladesh (BST), India (IST), & APAC

C. Visual Overlap Logic

- Display an interactive 24-hour visual bar per row displaying **Guaranteed Live Synchronous Hours** (minimum 4 to 6 hours guaranteed overlap daily between the client timezone and the Bangladeshi/South Asian delivery and sourcing pod).

3. Widget 2: Flexible RPO Squad Builder (Calculator UI Architecture)

A. Structural Modifications

- **Removal:** Remove top-level universal headcount slider.
- **Modular Card Layout:** Every stack category operates as an independent module with its own dedicated headcount counter, multi-select seniority, and technology tag selectors.

B. Role & Stack Configuration Modules

Clients can configure headcount, seniority, sourcing region, and technologies for each stack module:

```
+-----+
| [X] FULL STACK SYSTEMS & DATA PIPELINES |
| Headcount: [- 1 +] | Region: [South Asia/APAC v] |
| Seniority Tiers:  [ ] Junior  [ ] Mid-Level  [X] Senior  [X] Lead/Architect |
| Technologies:     [x] Next.js 15 [x] TypeScript [x] Node.js [ ] Python + React |
+-----+
```

C. Full Exhaustive Stack & Technology Master List

Stack Category	Seniority Tiers Available HTML+ 1	Granular Technology Tag Options HTML+ 4
Full Stack Systems	Junior, Mid-Level, Senior, Lead / Architect	Next.js 15, TypeScript, React.js, Node.js, Vue.js / Nuxt, Laravel + Vue, Python + React
Distributed Backend	Junior, Mid-Level, Senior, Lead / Architect	Go (Golang), Python (FastAPI/Django), PHP / Laravel, Java / Spring Boot, Rust, C# / .NET, Microservices, Kafka, WebSockets
Frontend Architecture	Junior, Mid-Level, Senior, Lead / Architect	React.js, Next.js 15, Vue.js, TypeScript, Angular, Tailwind CSS, Web Performance Optimization
Cloud, DevOps & Security	Junior, Mid-Level, Senior, Lead / Architect	AWS, Cloud Native Kubernetes (K8s), Docker, Terraform (IaC), CI/CD Pipelines, Zero-Trust Architecture, SOC 2 Compliance
Database & AI/Data Eng	Junior, Mid-Level, Senior, Lead / Architect	PostgreSQL, Redis, pgvector / Vector DBs (RAG Architecture), GraphQL, MongoDB, MySQL, Data Engineering
Quality Assurance (QA)	Junior, Mid-Level, Senior, Lead / Architect	Automation QA (Cypress/Playwright/Selenium), Manual Triage, Performance & Load Testing

Healthcare IT & Clinical	Junior, Mid-Level, Senior, Lead / Architect	NHS Clinical Interoperability, FHIR v4 / HL7, HIPAA Title II, PCI DSS, EMR/EHR (Epic/Cerner), Acute Triage
Sales, Admin & HR Ops	Junior, Mid-Level, Senior, Lead / Architect	B2B Field Sales, Revenue Ops, Admin Leadership, Fractional HR, Employee SOPs, KPI Frameworks

4. Cost & Velocity Comparison Grid (Replacing Jargon)

Reframe metrics to clearly highlight performance and financial differences against traditional agencies:

Metric Label	Traditional Recruiting Agency PDF	Pepoltek RPO Model PDF	Client Value Benchmark PDF+ 1
Average Time-to-Deploy	45 to 60 Days	2 to 7 Days	85% Faster Pipeline Velocity
Client HR Hours Reclaimed	5 to 10 Hours / Hire	40+ Hours / Hire Saved	Full Pre-Screening & Vetting
Placement Cost Model	20% to 25% Contingency Fee	Flat Monthly Subscription / Sprint	Up to 65% Cost-per-Hire Reduction
Candidate Vetting Standard	Resume Forwarding	Hard-Coded Code & HR Audits	100% Pre-Screened & Verified

5. Investment Calculation Logic & Instant Quote Generator

A. Rate Parameters (Hardcoded in Engine)

Calculations apply published hourly add-ons, sourcing rates, and telemetry brackets:

- **Offshore (South Asia / APAC Delivery Hub):** Junior (\$12/hr | \$1,920/mo), Mid (\$25/hr | \$4,000/mo), Senior (\$45/hr | \$7,200/mo), Lead/Architect (\$65/hr | \$10,400/mo).
- **Nearshore (LATAM / CEE):** Junior (\$20/hr | \$3,200/mo), Mid (\$35/hr | \$5,600/mo), Senior (\$60/hr | \$9,600/mo), Lead/Architect (\$85/hr | \$13,600/mo).
- **Onshore (US / UK / GCC):** Mid (\$55/hr | \$8,800/mo), Senior (\$95/hr | \$15,200/mo), Lead/Architect (\$110/hr | \$17,600/mo).
- **Dedicated Virtual Recruiter / Sourcer Add-On:** \$8/hr to \$20/hr (\$1,280/mo to \$3,200/mo per dedicated sourcer).

B. Mathematical Calculation Logic

1. Traditional Agency Cost = Sum(Selected Roles Annual Salary * 0.20 Placement Fee)

Example: 1 Sr Engineer (\$120,000) + 1 Mid Engineer (\$80,000) = \$200,000 * 20% = \$40,000 One-Time Fee.

2. Pepoltek Dedicated RPO Cost = Sum(Role Headcount * Regional Monthly Rate) + Dedicated Recruiter Fee

Example: 1 Sr APAC Engineer (\$7,200) + 1 Mid APAC Engineer (\$4,000) + 1 Dedicated Sourcer (\$1,280) = \$12,480/Month.

3. Calculated Net Client Savings = Traditional Agency Cost - (Pepoltek RPO Cost * First Month Deployment)

Display Output: "Saves \$27,520 in upfront placement fees while cutting time-to-fill from 45 days to 7 days."

C. Action Button (CTA)

- **Old CTA:** "Lock this squad"
- **New CTA:** "Generate RPO Proposal & Schedule Review" (triggers modal or auto-generated PDF quote pre-filled with configured roles, stack selections, time overlap guarantees, and side-by-side cost comparisons).

Specialist Delivery Engine & Dual Specialization Tracks

1. Section Positioning & SEO Strategy

- **Core Value Narrative:** Replace two separate, heavy page sections with one unified section. Differentiate Pepoltek from standard 1 to 2 person recruiting agencies by showcasing an integrated, multi-disciplinary pod.
PDF+ 1
- **Dual Rationale:**
 1. **Proprietary Technology:** In-house software engineers build internal recruitment tools, AI matching engines, and HRMS portals to empower recruiters, healthcare admins, and employers.
HTML+ 2
 2. **100% Specialist Hand-Vetting:** Zero generalist recruiters. Every application is evaluated by a real domain specialist (engineers audit code, medical specialists verify clinical licenses, and psychology specialists assess

behavioral fit).

HTML+ 3

- **Primary Target Keyword:** Specialist-Led RPO & Dual Sector Staffing
- **Secondary Keywords:** In-House Technical Vetting, Clinical Credential Verification, SDLC & Healthcare IT Talent
- **Section Heading (H2):** "Built by Domain Specialists, Powered by Integrated HR Technology"
- **Section Subtitle:** "Traditional agencies rely on generalist recruiters. Pepoltek deploys in-house software engineers, medical professionals, business analysts, and psychology specialists to hand-vet candidates and build custom HR tools."

2. Component 1: Multi-Disciplinary In-House Pod (5 Specialist Pillars)

Replace the previous 3-card breakdown with a 5-pillar grid representing the full in-house delivery engine:

HTML

+-----+	
IN-HOUSE SPECIALIST DELIVERY ENGINE	
[Badge: 100% Specialist Hand-Vetted • Zero Generalist Recruiters]	
+-----+	
1. NICHE RECRUITMENT SPECIALISTS	
Map global talent pipelines, manage active sourcing channels, and screen availability[cite: 3].	
+-----+	
2. BUSINESS ANALYSTS	
Translate complex enterprise demands into SDLC tech stack specs, SLAs, and sprint milestones[cite: 3].	
+-----+	
3. IN-HOUSE SOFTWARE ENGINEERS	
Build internal HR technology platforms while conducting hard-coded code and repository audits[cite: 3].	
+-----+	
4. MEDICAL & CLINICAL SPECIALISTS	
Verify active state medical licenses, FHIR/HIPAA compliance, and clinical facility readiness[cite: 3].	
+-----+	

| 5. PSYCHOLOGY & BEHAVIORAL SPECIALISTS

|

| Execute Behavioral Event Interviewing (BEI) and psychological frameworks (HEXACO / OCEAN)[cite: 3]. |

+-----+

3. Component 2: Simultaneous Dual Specialization Tracks (Side-by-Side)

A. Structural Fix

- **Removal:** Eliminate the sector toggle button ("Technology & SDLC Capabilities" vs "Healthcare & Clinical Capabilities").
PDF
- **Layout:** Display both core tracks side-by-side in a dual-column grid with equal visual weight so no domain remains hidden.
PDF

B. Dual Column Layout Architecture

+-----+

| TRACK 1: TECHNOLOGY & SDLC | TRACK 2: HEALTHCARE & CLINICAL

|

| Evaluated by: Software Engineers & BAs[cite: 3] | Evaluated by: Medical Specialists & Ops[cite: 3] |

+-----+

| FRONTEND ARCHITECTURE | CLINICAL STAFFING & ROTAS

|

| React, Vue, Angular, Next.js 15[cite: 15] | RN / NP, Physicians, ED, OPD, ICU[cite: 18]

|

| | |

| BACKEND & DISTRIBUTED SYSTEMS | HEALTH-TECH & EHR SYSTEMS

|

| Go, Node, Python, Java, PHP/Laravel, .NET[cite: 5] | Epic, Cerner, FHIR v4 / HL7, Telehealth[cite: 18]

| | |

| DATA, AI & CLOUD DEVOPS | REGULATORY COMPLIANCE

|

| Data Eng, AI/ML, AWS, Kubernetes, Zero-Trust[cite: 15] | HIPAA Title II, PCI DSS, BAA Compliance[cite: 3, 5] |

ENGAGEMENT & VISA PIPELINES	CLINICAL ONBOARDING	
W2, C2C, 1099, OPT/STEM, H-1B, Green Card License Checks, Credentialing Logs[cite: 18]		
+-----+		

4. Implementation Specifications

A. Clean-Up Directives

- Remove hidden state logic (`activeTab === 'tech' / activeTab === 'healthcare'`) to ensure all technology and clinical capability tags are indexed simultaneously by Google search crawlers.
PDF
- Ensure both columns share identical padding, border styles, and stack tag badge components for visual symmetry[cite: 17].

Specialist RPO Execution Team & Dual Specialization Tracks

1. Section Positioning & SEO Strategy

- Core Value Narrative:** Replace internal jargon like "delivery pod" with traditional RPO language that enterprise HR leaders and hiring managers immediately recognize. Combine AI interview capabilities with human domain specialist verification to ensure every candidate is thoroughly pre-screened.
- Dual Rationale:**
 - Proprietary Technology & AI Interviewing:** In-house software engineers build automated AI video interview portals, skill assessment bots, and ATS integration tools to streamline screening for recruiters and employers.
 - Specialist Hand-Vetting:** AI interview screening is combined with direct specialist evaluation. Software engineers review code, clinical specialists verify medical credentials, and psychology specialists evaluate behavioral scores.
- Primary Target Keyword:** Specialist-Led RPO & AI-Driven Talent Acquisition
- Secondary Keywords:** AI Interview Screening, Clinical Credential Verification, Enterprise SDLC Staffing, Healthcare RPO Solutions
- Section Heading (H2):** "Enterprise RPO Powered by AI Interviewing and Domain Specialists"
- Section Subtitle:** "Move beyond generalist recruiters. Pepoltek pairs AI-driven video interviewing and automated skill evaluation with dedicated teams of software engineers, medical specialists, and HR strategists to hand-vet every candidate."

2. Component 1: Specialist RPO Execution Team (5 Core Pillars)

Reframe the team structure using standard enterprise RPO terminology:

+-----+

SPECIALIST RPO EXECUTION TEAM	
[Badge: AI Interview Vetted • 100% Specialist Hand-Verified]	
+-----+	
1. NICHE RECRUITMENT SPECIALISTS	
Manage talent acquisition pipelines, direct sourcing outreach, and candidate engagement[cite: 3, 18].	
+-----+	
2. BUSINESS ANALYSTS & HR STRATEGISTS	
Translate client hiring requisitions into SDLC stack specs, job profiles, and SLAs[cite: 3, 18].	
+-----+	
3. SOFTWARE & AI SYSTEMS ENGINEERS	
Develop internal AI interview engines and evaluate developer repository architecture[cite: 3, 5, 18].	
+-----+	
4. MEDICAL & CLINICAL COMPLIANCE SPECIALISTS	
Verify state medical licenses, HIPAA/FHIR compliance, and clinical facility readiness[cite: 3, 14, 18].	
+-----+	
5. PSYCHOLOGY & BEHAVIORAL SPECIALISTS	
Oversee AI video interview analytics, BEI frameworks, and HEXACO/OCEAN evaluations[cite: 3, 18].	
+-----+	

3. Component 2: Dual Specialization Tracks with AI Interview Capabilities

Display both specialization tracks side-by-side with AI video interviewing and skill evaluation embedded directly into the hiring workflow:

+-----+	
TRACK 1: TECHNOLOGY & SDLC RPO CLINICAL RPO	TRACK 2: HEALTHCARE & CLINICAL RPO
Verified by: Engineers & HR Analysts[cite: 3] Verified by: Medical Specialists & Ops[cite: 3]	

+-----+-----+	
AI INTERVIEW & CODING EVALUATION VERIFICATION	AI CLINICAL SCREENING &
Automated AI technical screening, interactive	AI video interview triage for clinical scenarios,
coding challenges, and repository audits[cite: 18].	background checks, and license verification[cite: 18].
FRONTEND & APPLICATION ARCHITECTURE FACILITY ROTAS	CLINICAL STAFFING &
React, Vue, Angular, Next.js 15, Mobile[cite: 15]	Registered Nurses (RN/NP), Physicians, ED[cite: 18].
BACKEND & DISTRIBUTED SYSTEMS INTEGRATION	HEALTH-TECH & EMR/EHR
Go, Node.js, Python, Java, PHP/Laravel[cite: 5]	Epic, Cerner, FHIR v4 / HL7, Telehealth[cite: 18].
CLOUD, DEVOPS & CYBERSECURITY COMPLIANCE	REGULATORY & PATIENT DATA
AWS, Kubernetes, CI/CD, Zero-Trust[cite: 14, 15]	HIPAA Title II, PCI DSS, BAA Clearance[cite: 3, 5].
ENGAGEMENT & FLEXIBLE CONTRACTING CREDENTIALING	CLINICAL ONBOARDING &
W2, C2C, 1099, Direct Hire, Visa Support[cite: 17]	Automated verification logs & onboarding[cite: 18].
+-----+-----+	

4. Developer Implementation Specifications

A. Terminology Replacement Directives

- Replace "In-House Delivery Pod" with **Specialist RPO Execution Team** or **Dedicated RPO Team**.
- Replace "Active Pods" with **Active RPO Sourcing Teams**.
- Replace "Pod Sprints" with **RPO Deployment Sprints**.
- Replace "Technical Vetting" with **AI Interviewing & Specialist Verification**

Streamlined 7-Day RPO Deployment Workflow

1. Section Positioning & SEO Strategy

- **Core Value Narrative:** Consolidate the two separate, scroll-hijacked sections into a single, highly performant 5-step workflow component. Replace playful cartoon mascots and floating avatars with clean, executive-level B2B graphics and interactive UI tabs.
- **Primary Target Keyword:** Enterprise RPO Deployment Sprint
- **Secondary Keywords:** 7-Day Talent Acquisition Workflow, AI Candidate Screening, Panel Interview Orchestration, Onboarding SLA
- **Section Heading (H2):** "7 Days from Technical Brief to Deployed Specialist"
- **Section Subtitle:** "A transparent 5-stage orchestration workflow powered by AI video screening and domain specialist verification. Frictionless, interactive, and built for rapid enterprise execution."

2. Critical UX & Graphic Removal Directives

1. **Eliminate Scroll Hijacking & Sticky Pins:** Completely remove the forced vertical sticky-scroll mechanism where users must scroll multiple viewport heights just to step through phases. This prevents user frustration, page bounce, and mobile conversion churn.
2. **Purge Playful Cartoon Assets:** Strip out all 3D cartoon avatars, paper airplane graphics, floating popups ("Explore the sprint / Click me"), and mascot figures walking along progress bars.
3. **Professional Graphic Replacement:** Replace cartoon assets with sleek, high-contrast SVG vector line icons (e.g., Lucide React icons for search, AI processing, security checks, and panel scheduling) paired with real UI deliverable mockups (e.g., ATS tracking sheets, scorecards, or calendar alignment cards).

3. Consolidated 5-Stage RPO Sprint Architecture

Merge the two sections into a single responsive, tabbed interactive component where clicking or hovering over a step immediately displays the stage details without moving page scroll.

| Automated interview calendar sync and briefings. | CANDIDATE EVALUATION
SCORECARD & INTERVIEW LOG ||

| • Executive Summary Reports | Candidate: Alex Morgan | Vetting: 94/100
||

| Pre-interview scorecards delivered to hiring panel. | Tech Stack: Next.js 15, Kafka,
Microservices ||

| • Turnaround SLA: Within 48 Hours | AI Video Log: Verified • Behavioral

| +-----+ |
+-----+

Detailed Stage Breakdown

- **Step 01: Strategic Discovery & Role Alignment (Day 1)**
 - **Process:** Business Analysts conduct deep-dive technical alignment to map tech stacks, clinical requirements, compensation bands, and operational SLAs.
 - **Deliverables:** Role Taxonomy Sheet, Search Strategy Document, and Target Profile Matrix.
- **Step 02: AI Market Mapping & Curation (Days 2 to 3)**
 - **Process:** AI-HRMS engines execute boolean string logic and X-Ray searches across global databases to surface passive, high-intent professionals.
 - **Deliverables:** ATS-Ready Tracking Sheet with 50+ pre-parsed candidate profiles.
- **Step 03: AI Interviewing & Specialist Hard-Vetting (Days 4 to 5)**
 - **Process:** Candidates complete automated AI video interviewing followed by direct domain specialist evaluation (software engineers audit code repos; clinical specialists verify state licenses).
 - **Deliverables:** Standardized Evaluation Scorecards, Hard-Coded Audit Logs, and AI Video Summaries.
- **Step 04: Panel Interview Orchestration (Days 6 to 7)**
 - **Process:** Dedicated recruiters coordinate client panel scheduling, provide pre-interview briefings, and aggregate real-time panel feedback.
 - **Deliverables:** Panel Scheduling Deck, Briefing Notes, and Feedback Aggregation Matrix.
- **Step 05: Deployment, Onboarding & 30/60/90 Day Ramp (Post-Sprint)**
 - **Process:** Legal operations support final offer negotiations, engagement contracts (W2, C2C, 1099), remote workspace setup, and post-placement retention checks.
 - **Deliverables:** Executed Agreement, Onboarding SOPs, and 30/60/90 Day Retention Checkpoints.

Global Restructuring & Flow Hierarchy

To eliminate scroll churn, the new page flow from the top down will be:

1. Hero Section
2. Specialist RPO Execution Team & Tracks
3. Global Overlap & Squad Builder Calculator
4. **Commercial Engagement Terms** (Moved up directly below the calculator)
5. **Proprietary AI-HRMS Client Portal** (Interactive 3-Tab Showcase)
6. **Proven Technical Work Showcase** (Streamlined 3-Card Widget)
7. **The Candidate Talent Ecosystem** (Professional Redesign)
8. **Final Enterprise CTA** (De-cartooned)

Audit Spec 1: Commercial Engagement Terms (Repositioned)

- **Current Issue:** Buried too far down the page. Disconnected from the calculator.
- **Fix:** Move this section immediately below the Squad Builder Calculator so clients see the pricing logic and the commercial guarantees back-to-back.
- **UI/UX:** A sleek, high-contrast, horizontal 3-column flex layout. No tabs—display all three models side-by-side for instant comparison.

Copy & Data Blueprint:

- **Section Title:** Flexible Commercial Models & Risk-Free Guarantees
- **Column 1: Direct Hire & Permanent Placement**
 - *Fee Structure:* Standard 15% to 20% first-year annual compensation. (Market entry rate: 12% for initial 3 hires).
 - *Guarantee:* 90-Day Placement Replacement Guarantee.
- **Column 2: IT & Healthcare Staff Augmentation**
 - *Fee Structure:* Transparent hourly/monthly billing per deployed specialist. 10% rate reduction on 6-month squad commitments.
 - *Guarantee:* 2-Week Risk-Free Trial Period (\$0 billed if performance benchmarks fail).
- **Column 3: Employer of Record (EOR) & Payroll**
 - *Fee Structure:* Complete payroll, tax withholding, and localized HR compliance across 15+ countries.

Audit Spec 2: Proprietary AI-HRMS Client Portal Showcase

- **Current Issue:** A single static image that doesn't demonstrate the actual value of the proprietary software.
- **Fix:** Implement a dynamic, interactive UI preview module with 3 clickable tabs. Clicking a tab instantly changes the mockup displayed on the right.
- **SEO Narrative:** Focus on "AI Candidate Matching", "Hard-Coded System Audits", and "Behavioral Video Screening".

Interactive Component Blueprint:

Plaintext

+-----+

| [SECTION BADGE: PROPRIETARY HR TECHNOLOGY]

|

| H2: Ask for the shortlist in plain language.

|

| Subtitle: Our AI-HRMS portal translates natural language queries into instant, verified talent pipelines.

|

+-----+

| INTERACTIVE FEATURE NAV: [1] Natural Language Query | [2] System Design Audit Logs | [3] Video Scorecards

|

+-----+

| DYNAMIC UI DISPLAY (Changes based on selected tab):

|

|

|

| IF [1] IS ACTIVE:

|

| • Prompt Input UI: "Filter software engineers with 5+ years in Node.js and C2C readiness"

|

| • Output UI: Ranked matches showing match score (98%), visa status (H-1B, C2C), and timezone overlap.

|

|

|

| IF [2] IS ACTIVE:

|

| • Output UI: Raw technical logs showing Code Quality (96/100), Test Coverage (94%), and Redis memory safety.

|

| • Terminal Output: [PASSED] 14/14 Integration Benchmarks Clean.

|

|

|

| IF [3] IS ACTIVE:

|

| • Output UI: HEXACO Integrity (92/100) and OCEAN Adaptability (88/100) radar charts.

|

| • Video UI: A clean 90-second embedded video player preview for the candidate's technical explainer.

|

+-----+

Audit Spec 3: Proven Technical Work Showcase (Dynamic Widget)

- **Current Issue:** 6 giant cards taking up a massive viewport block.

- **Fix:** Condense into a 3-card horizontal grid that pulls dynamically from your [/case-studies](#) CMS. This proves your team actually builds complex systems, giving authority to your tech screening capabilities.

Component Blueprint:

- **Section Badge:** VERIFIED TECHNICAL FOOTPRINT | PEPOLTEK LIMITED
- **Section Title:** Systems Built, Deployed & Scaled
- **Interactive Toggles:** All Builds | Enterprise Web Apps | Health-Tech & EMR | SaaS
- **Card 1: Enterprise HR-Tech & AI-HRMS Platform**
 - *Tech Stack:* Node.js, React, Python/NLP, Redis, AWS
 - *Impact:* Reduced candidate sourcing latency to seconds; reclaimed 40+ engineering hours per hire.
- **Card 2: Compliant Health-Tech EMR Integration Hub**
 - *Tech Stack:* PHP/Laravel, PostgreSQL, Docker, HIPAA Vault
 - *Impact:* Zero compliance failures; 100% data encryption standards validated.
- **Card 3: High-Throughput Distributed Aggregator**
 - *Tech Stack:* Go, Kafka, Kubernetes, React
 - *Impact:* 99.99% uptime maintained under peak loads; 14/14 integration benchmarks passed clean.
- **Footer CTA:** "Browse Full Technical Portfolio & Case Studies →" (Routes to standalone [/case-studies](#) page detailed in your blueprint).

Audit Spec 4: The Candidate Talent Ecosystem

- **Current Issue:** 3D cartoons of kids with laptops destroy the enterprise RPO trust.
- **Fix:** Strip all cartoon graphics. Use clean UI mockups, abstract tech nodes, or professional photography. Shift the language to emphasize AI assistance and career upskilling (Talent Academy).
- **Section Title:** The Global Talent Ecosystem
- **Subtitle:** Upload your resume, leverage AI to build an ATS-ready profile, and let enterprise opportunities find you.

The 4 Pillars (Redesigned):

1. **AI Resume Intake & Parsing:**
 - *Graphic:* Minimalist UI of a resume scanning into structured data fields.
 - *Copy:* Upload your CV and let our AI engine instantly parse, refine, and structure your experience into a top-tier ATS-friendly profile.
2. **Reverse Job Search Engine:**
 - *Graphic:* A radar/matching UI element showing a candidate profile linking to a Fortune 500 logo.
 - *Copy:* Stop applying into the void. Scan live client pipelines and get discovered by top enterprises based on your verified tech stack and clinical credentials.
3. **Talent Academy & Technical Vetting:**
 - *Graphic:* Dashboard snippet showing a "Profile Readiness: 88%" gauge and a verified skill badge.

- *Copy:* Pinpoint skill gaps with our technical diagnostic exams. Upskill through enterprise-accredited modules to unlock Tier 1 rates and priority deployment sprints.
- 4. **Referral Bounty Network:**
 - *Graphic:* A clean ledger UI showing a \$500 payout notification.
 - *Copy:* Monetize your professional network. Refer top-tier engineers or clinical specialists and track your reward payouts from submission to successful placement.

Audit Spec 5: Final CTA (Zero Risk Hiring)

- **Current Issue:** The massive 3D cartoon character holding a clipboard is inappropriate for an enterprise B2B service.
- **Fix:** Remove the illustration completely. Replace the right side of the banner with a sleek, dark-themed UI dashboard mockup showing a "Vetted Shortlist" being securely transmitted, or leave it as a high-contrast typography-focused banner.
- **Copy Update:** "Submit your requisition. We deploy a verified shortlist in 48 hours."
- **Buttons:** Primary: "Start 14-Day Risk-Free Trial" | Secondary: "Schedule RPO Consultation"

Let me know if this aligns with your vision for the bottom half of the homepage, or if you need the developer specs for the standalone [/case-studies](#) CMS page built out next.
